

# Be a happy SWLer

BA6QH/QRP The Way of QRP 2022-05-18 06:02 Posted in Hubei

## SF400B follow-up story

I wonder if you old irons still remember that Qigong released a series of SWL listening reports after purchasing the PL-368 radio last year, one of which is a listening report on receiving DX signals, see: Listening Report DX from the Ink Lake

### 来自墨水湖畔的收听报告 DX篇

QRP之道 2021-02-19 06:03

在连续发布了几篇收听报告后，有朋友问这台收音机接收亚洲以及东欧等DX信号，也会这么好么？这么短的天线能接收到DX台的信号吗？事实证明这种担心是多余的，视频里来自俄罗斯、法国、西班牙等DX台信号清晰可辨，其中，瑞典南部城镇布罗斯市建市400周年的特设台SF400B是七公最感兴趣的！

#### A SWL listening report published last year

On the QRZ page of the SF400B, the theme of the event is stated:  
The call sign SF400B ad hoc station will be active from January 1, 2021 to December 31, 2021. The event was organized by the local amateur radio club in bors, bors radio amarer-SK6LK June 29, 1621, Bosch was founded.

Since then, 400 years have passed and our ham in the city of bors wants to take part in this celebration. What could be better than spreading this information wirelessly around the world? This year, we are ambitious to connect as many countries as possible and make bors famous. Please visit our website [www.sf400b.se](http://www.sf400b.se).

Of course, the idea was to show the folks from Boros that the "ham radio hobby" is still "lively". Hopefully this will attract more people to our hobby.

### **Boras 400th Anniversary Special Stand SF400B**

Amateur radio is always at the forefront of technology while adhering to the ancient tradition. To a large extent, it was the voluntary experimentation of hams and hams that led to radio television, mobile phones, and similar technological achievements. Morse code telegraphy (invented in the 19th century) is an example of an ancient technology that is now only used by radio amateurs and is still very effective.

The hundreds of QSL cards they have received are displayed on the event webpage, and they hope to keep getting more QSL cards.

**SF400B**

Boras City 400 Years. The activity has now come to an end. We thank all radioamateurs for helping us celebrate the 400 year anniversary on the air during 2021.

QSL card received by the SF400B ad hoc station

Although Qigong did not pay more attention to the SWL listening report released last year, he received a letter from SM6EAT Roland a few days ago, saying that they had seen this video recorded by Qigong and liked it very much and uploaded it to Their club's website is on: <https://www.sk6lk.se>

SM6EAT Roland and its QSL card

And told Qigong that the operator in the video was SM6CUK Lars, and they would send Qigong a QSL card to confirm this SWL through BUR0!

Listen to the video at SWL on the club website

When the amateur radio was just opened in 1992, Qigong applied for the call sign of the amateur radio listening station: BG6-3-042. After a year of listening, he gradually entered the room and learned about the

communication procedures of the amateur radio. The teachings of the predecessors also made us know that the QSL card of the listening station is the priority to reply.

Qigong has long said that in the end of ham radio playing, it is to return to the basics and become a SWLer, to experience the fun of listening. It can be said that it was a pleasant surprise to receive a letter from SM6EAT Roland, and he quickly replied to express his gratitude.

When I learned that Qigong likes to collect paper cards, he even took a photo of the prepared card and said that he would send it to BUR0 next time...

Prepare to send a card to Qigong to confirm SWL

**The OP operating at that time was SM6CUK Lars**

SM6EAT Roland also mentioned in the letter that their club had done more than 10,000 QSOs last year, and had made contacts with more than 200 DXCC prefixes. Most of them are made by SM6CUK and SM6NT. This is a great activity during the pandemic!

Their commemorative activities were carried out with great success, and they have their logs and maps on the activity webpage [www.sf400b.se](http://www.sf400b.se), showing the countries that have been contacted. All contacts are recorded on this page, which is a very special feature.

### Confirm the labeling of the area after contacting the QSO

SF400B would like to receive more paper QSL cards

Qigong checked the map on their ad hoc website and found that some friends in China had successfully communicated, including BG6SNJ friends who were also in Hubei.

The map can display the relevant information of the contact object

Finally, Qigong found the original video that was recorded at the beginning, and now attach the relevant information when listening to the end:

Call: SF400B

Date: 15/Feb/2021
